

# Smart Planner

## for Process Efficiency

**FOCUS** **MRP**

Focus MRP has finite and infinite planning capabilities to assist complex manufacturing processes achieve efficiency with greater degree of compliance and customer satisfaction. Be it a single or multiple location plant, this integrated scalable solution is a boon for process manufacturers.

## BENEFITS

- Minimize production bottlenecks
- Achieve greater transparency and operational control
- Reduce cost and increase resource utilization
- Better customer satisfaction with on-time delivery
- Plan order or forecast based production for increased profitability

## KEY FEATURES

- Define calendars for multiple locations with work hours
- Skill based identification and planning of man or machine for work centers
- Scheduling of output based on plant-wise capacity
- Prepare bill of material for required output
- Achieve standard output with pre-defined route in production line
- On-time material requirement analysis and procurement reminders
- Generate forecast, completion or process based reports

## MODULES

- Production Master Data
- Material Requirement Planning
- Shop Floor Management
- Integration with Finance & Inventory
